ACUSEEK NVR

Type it, seek fast

Guanlan by HIKVISION®

Why We Need AcuSeek

In security operations, every second counts. Traditional manual video review can take hours to find a single incident, delaying critical responses.

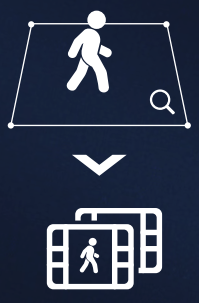
Traditional video search is difficult and limited

Too much video takes too much review time

Miss the best opportunity to recover the loss

Hikvision's Video Search Tech History

Smart Search



Draw a rule box to retrieve videos with target objects in a specific area

AcuSearch

Retrieve all videos of a specific object with just one click

AcuSeek

Man in blue top

Retrieve videos of objects with feature description by text

What is AcuSeek

AcuSeek NVRs, based on **a large multimodal AI model**, enable **video searches using text**, allowing users to quickly find videos featuring a specific object.

1

Search Broadly

Search for objects such as people and cars, or find specific items by connecting them to a certain feature.

2

Search Instantly

Get results in seconds from hours of video footage – no more manual searching frame by frame.

3

Search Accurately

You provide detailed text input, and the system will understand the nuances to reduce false matches.

4

Search Cross-Platform

Visual search via NVR webpage, local GUI, HikConnect, Hik-Partner Pro and HikCentral Professional (coming soon).

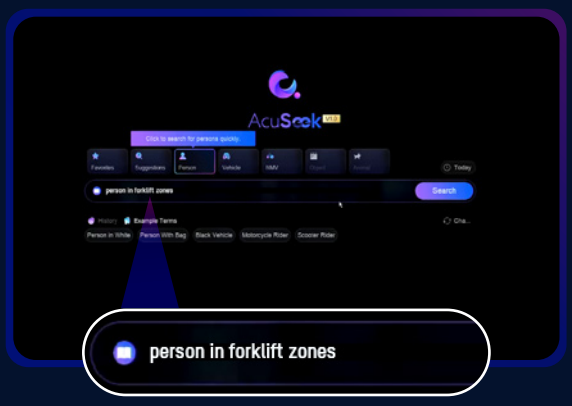
*You can input text in multiple languages not only through PC and mobile software, but also when operating the AcuSeek NVR on-site with a connected display.

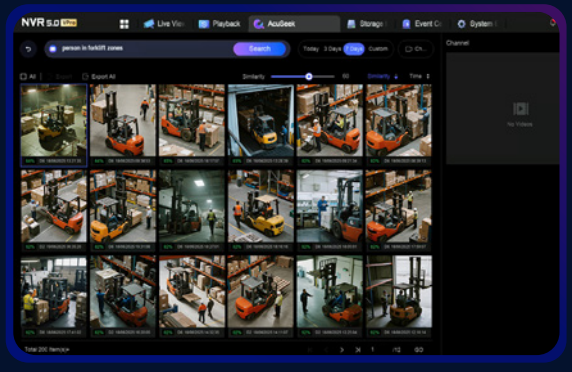
How to Use AcuSeek

You have a ***prompt***,
AcuSeek has a ***response***!

Factories

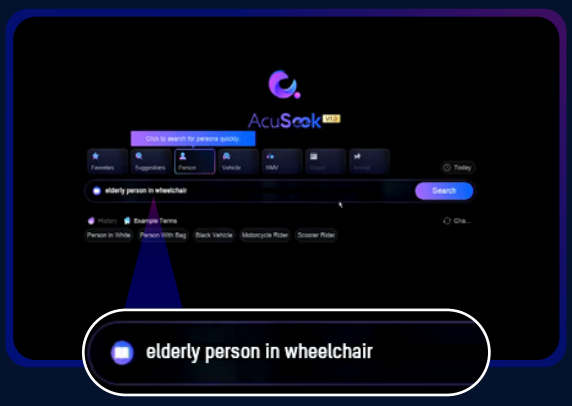
Find persons entering the forklift operating zones

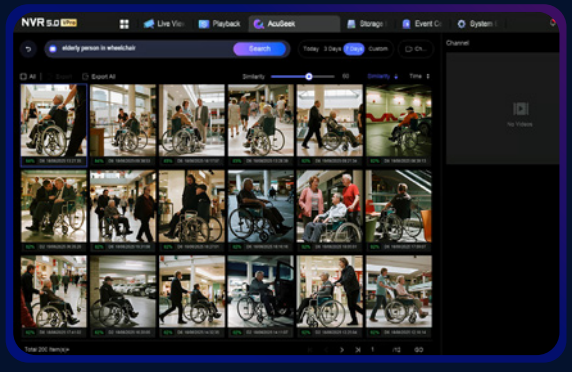




Shopping Malls

Locate children or elderly people separated from companions

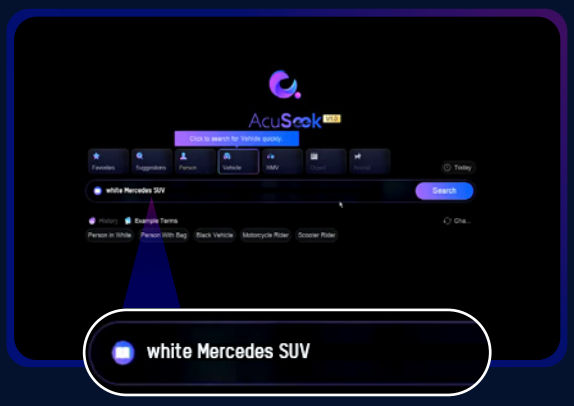


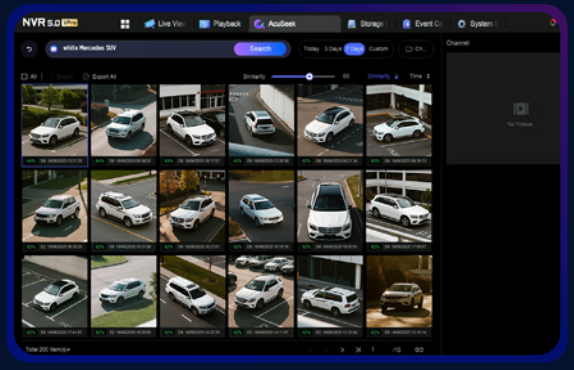


HIKVISION

Business Parks

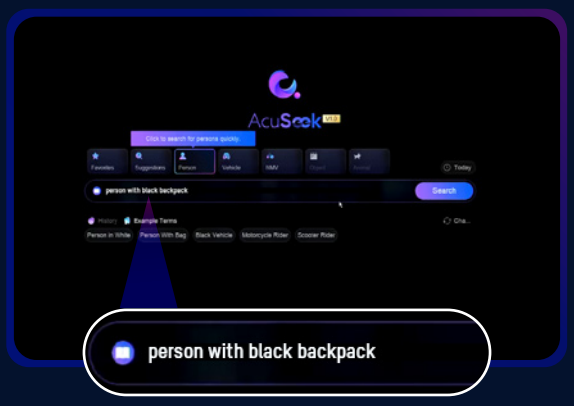
Assist employees or visitors in locating their parked cars

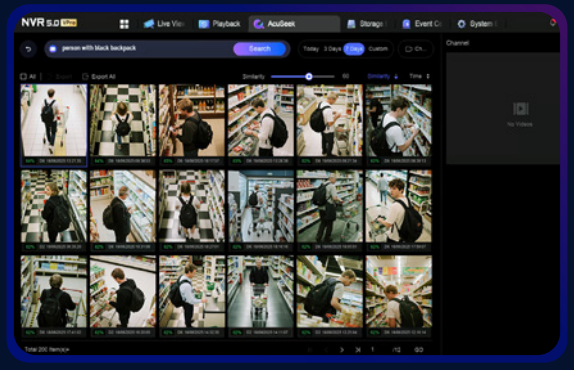




Supermarkets

Recover customers' belongings, such as backpacks or handbags





Operating AcuSeek NVRs from Remote

Multiple access methods. One unified experience.
